

## How To Measure Your End Fitting

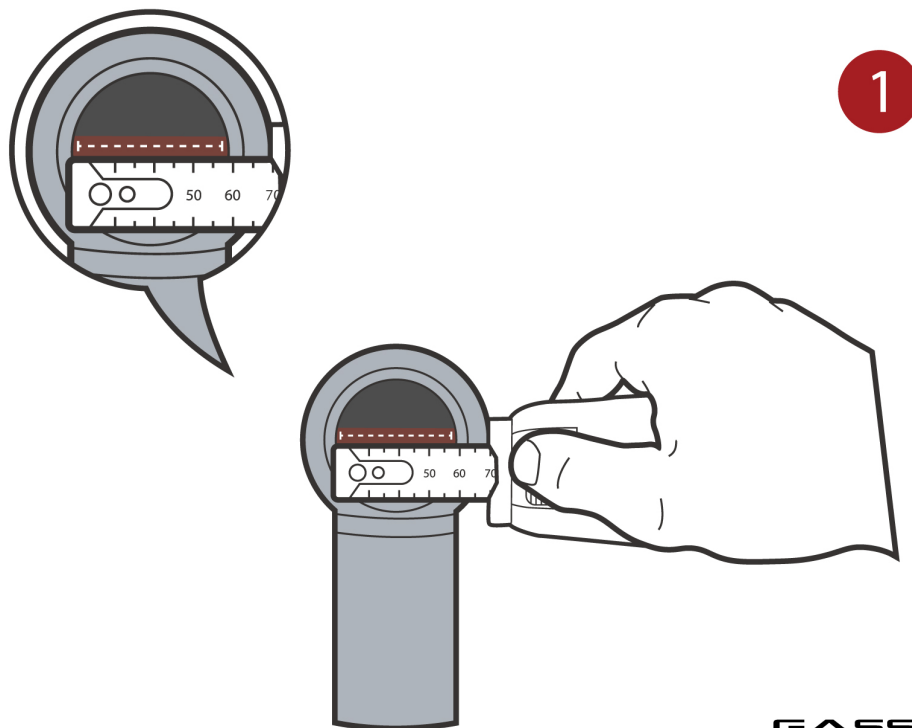

All our gas struts come with ball cup end fittings. The standard end fittings make up the Extended Length of the gas strut.

[1. Measure The Diameter >](#)

[2. Measure The Length >](#)

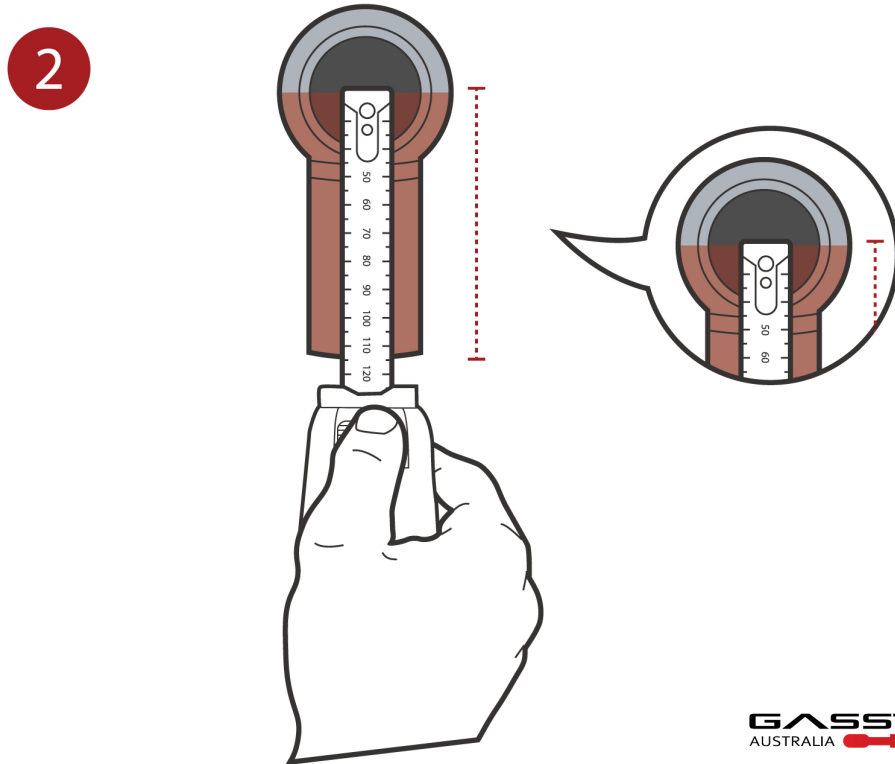

### 1. Measure The Diameter

The diameter is measured (mm) across the widest part of the hole.

## 2. Measure The Length

The Length is measured (mm) from the middle of the hole to the end of the thread
